SUMMARY

AI Engineer and Data Scientist who takes LLM agents from prototype to governed production: multi-agent systems on Azure Databricks (LangGraph, MLflow, Unity Catalog), deployed on-site with enterprise business teams. Named inventor on a published patent application, IEEE-published, M.S. Data Science (4.0 GPA).

EXPERIENCE

Associate Consultant - AI Engineering | Applexus Technologies, Seattle, WA — Aug 2026 – Present

- Design and ship domain-specific AI agents (finance, spend analytics, supply chain, predictive maintenance) on Azure Databricks with LangGraph, LangChain, Unity Catalog, and MLflow, giving business teams natural-language access to governed data
- Build and maintain the multi-agent orchestration: supervisor over domain specialists, planner and executor on different model tiers to control cost, deterministic routing where no model is needed, human review before write-back
- Deploy on Databricks Apps and Model Serving with FastAPI backends and React/Dash front ends, MLflow tracing on every run; build EULR, Applexus's data and use-case discovery accelerator for Databricks (LangGraph agent layer, FastAPI, React)

Trainee Consultant - Data Science & AI | Applexus Technologies, Seattle, WA — Nov 2025 – Jul 2026

- Engineered an internal AI-powered EDA platform (Python, Node.js, Electron) with 50+ statistical tests, local LLM interpretation (Ollama), and automated PPTX/PDF reporting, cutting EDA cycle time by ~50%
- Ran AI/ML feasibility assessments for 10+ enterprise use cases and built spend-analytics and demand-forecasting pipelines on Azure Databricks
- Represented Applexus at an on-site client hackathon and at Databricks Data + AI Summit 2026

Data Analyst | EcoServants Project, Remote, USA — Jun 2025 – Nov 2025

- Built a sponsorship data-analysis framework that turned partnership data into targeting insights, increasing new-partner identification by 40% and donor-targeting accuracy by 35%

Data Scientist, Capstone Intern | Honda Research Institute USA, Remote — Jan 2025 – May 2025

- Built and deployed a GPT-4-based data preprocessing pipeline (transformation, imputation, anomaly detection) with MLOps practices, reducing manual effort by 60%
- Benchmarked GPT-4, Mistral 7B, Falcon 7B, and LLaMA 3 for structured response generation (+30% processing accuracy); built a Groq Mixtral-8x7b visualization layer for UI-driven EDA

Data Scientist Intern | Pucho Digital Health Inc., Remote, India — Dec 2022 – Apr 2023

- Modified a ResNet50 architecture for audio-based COVID-19 detection and shipped it to production (+4% precision, +15% detection accuracy); added MFCC spectral-subtraction noise reduction, about 20% better on noisy inputs

Data Science Research Intern | AI & Robotics Center, VIT-AP University, India — Jun 2021 – Dec 2022

- Co-invented an intelligent traffic-control system using deep and reinforcement learning to prioritize emergency vehicles (published patent application, Ref. 202341042839)
- Built a UAV-based aquaculture monitoring system with YOLOv5 (84% accuracy, IEEE ACCAI-2023); presented perovskite solar-cell prediction research (99.3% accuracy) at PVSEC-31

TECHNICAL SKILLS

Agentic AI & LLMs: LangGraph, LangChain, multi-agent orchestration, MCP, RAG, Databricks Vector Search, prompt engineering, LLM evaluation, Ollama, LiteLLM, Hugging Face
ML & MLOps: PyTorch, TensorFlow, Scikit-learn, XGBoost, Keras, NLP, computer vision (OpenCV), MLflow (tracking, registry, tracing), Databricks Mosaic AI, FastAPI, Docker, CI/CD
Data & Cloud: Azure Databricks, Unity Catalog, Delta Lake, PySpark, SQL, Snowflake, AWS (S3, EC2, SageMaker), ETL pipelines
Languages, Tools & BI: Python, SQL, R, Java, JavaScript, MATLAB, Bash, Git, Power BI, Tableau

EDUCATION

University of Colorado Boulder, Boulder, CO | M.S. Data Science, GPA: 4.0/4.0 — Aug 2023 – May 2025
Vellore Institute of Technology, India | B.Tech Computer Science (Data Analytics), GPA: 9.07/10 — Jul 2019 – May 2023

PROJECTS

Predictive Maintenance for Aluminum Manufacturing | DaSSA Hackathon, CU Boulder | XGBoost, Random Forest, SMOTE — M.S. coursework

- Predicted equipment failure from 18 sensor streams (94.4% accuracy, 0.988 AUC, held-out) with SMOTE and tuned ensembles; top-5 finish

Amazon Review Sentiment Analyzer | Python, React, Flask, BERT, VADER, GPT summaries — Aug 2024 – Dec 2024

- Led a team of 3 to build a full-stack NLP platform with a hybrid VADER + BERT model and LLM-generated summaries, enabling 60% faster product evaluation

PUBLICATIONS & PATENTS

- **Patent application (published):** Intelligent Traffic Control System (Ref. 202341042839), Indian Patent Office
- **IEEE:** Automated Monitoring System for Healthier Aquaculture Farming, ACCAI-2023
- **Conference:** AI Algorithms for Perovskite Solar Cells Fabrication, PVSEC-31
- **Book chapter:** "Navigating Ethical Dilemmas and Privacy Concerns in AI-Driven Parenting Technologies," NIPA GENX Publications, 2026
